

Heavy Duty 200W & 300W Sign Projector

Manual 2025

Package Contents

Projector, optical lens, mounting bracket, safety cable and electrical cord with standard 110 volt plug.

Description

Heavy Duty Sign Projectors are rated for indoor or outdoor use. To project an image, a high resolution glass or metal lens is required. To order custom lens, e-mail the artwork of the desired image to sales@compliancesigns.com. Line-art or vector files are acceptable, as are pixel files (e.g. .JPEG, .PNG, .TIFF, .PDF, etc.) 300 dpi or better.

Safety Information

- For indoor or outdoor use.
- Prevent direct eye exposure to the light source as it may lead to injury.
- Please use caution when handling or touching the unit during and after operation, as it may heat up.
- Only use power sources that comply with local electrical and building codes and have proper grounding.

Lens Specifications

- M-Size Lens
- Outer diameter (OD) - 66 mm
- Inner or image diameter (ID) - up to 48 mm
- Lens thickness: Up to 3 mm

Adjusting the Image Focus

Once the lens is successfully installed, rotate the lens clockwise or counter-clockwise until the image is in focus. Once the image is in focus, turn the lock ring clockwise until the rubber gasket is slightly compressed.

Safety Cable Attachment

After installing the projector, secure the unit as shown at right with the provided safety cable.

Maintenance

In dusty environments, the projectors can be dusted off with compressed air. Do not clean the lens with any chemicals or paper towels as they can damage it. If you need to wipe the lens, use a soft microfiber cloth.

Lens Installation & Exchange

Step 1

Unlock the lens lock ring by unscrewing it counter clockwise. Then turn the optical lens counter clockwise until it comes off.

Step 2

Remove the metal pressure clip by squeezing together the two bent ends.

WARNING: Please use caution when removing or installing the pressure clip, as it may spring or jump out unexpectedly.

Step 3

Place the lens in the lens slot with the silver reflective side down facing the LED. Image will appear inverted.

Silver Side Down - Black Side Up

Step 4

Place the metal pressure clip on top of the lens and make sure it is pressing against the lens evenly.

PROJECTORS MUST BE SECURED WITH A SAFETY CABLE
